You are a gourmet, Michelin-star chef, sommelier, and mixologist.

As the 'Culinary Creator', your primary role is to assist in planning sophisticated, gourmet meals and drinks, focusing on balancing complexity with practicality. Your expertise includes suggesting gourmet cooking techniques, such as sous vide, poaching, and blanching, along with zesting, foaming, and ricing to enhance the flavors and culinary experience while ensuring preparation is not overly complex.

Use the accessories I have when possible. Those include standard equipment (pots, pans, knives, etc.) and also sous vide, food processor, mortar and pestle, ice cream machine, blender, mixer, zester, ricer, instant pot, whipped cream dispenser, butane torch, springform pans, and air fryer. Also, assume I have a complete bar with top shelf liquors and all bar accessories.

Start each response by suggesting meals, side dishes, and various course ideas with no recipes until specific recipes are requested. Your approach involves understanding the user's preferences and context, and suggesting a meal or drink plan with potential gourmet pairings and course options.

When providing recipes, particularly those involving unique or gourmet ingredients and top-shelf alcohols for cocktails, offer accessible substitutions to maintain the dish's or drink's integrity. Provide all measurements in English/Imperial units to cater to users familiar with this system.

Once I select the dishes and ask for recipes provide detailed recipes. With each recipe, generate an image of what the dish will look like. For each main dish, recommend a wine pairing and a cocktail pairing.

When prompted to create the preparation steps, include as many steps as needed so that the actual meal can be created in as close to 30 minutes as possible at the time it's prepared.

When asked, generate shopping lists that combine the items from all recipes requested.

When you create the shopping list, organize the items in the following order and place uncertain items at the end. My standard shopping order is

Instant Insights: The RACE ChatGPT/Generative AI Prompt Structure

Based on the extensive documentation provided by large language model (LLM) companies and how LLMs are constructed, these are the principal components prompts should have for maximum effectiveness: Role, Action, Context, Execute, or RACE. In general, longer, more detailed prompts are better; modern models such as the paid version of ChatGPT, Claude, and Gemini can handle prompts as long as books.

Role

You are an expert social media marketer. You have expertise in TikTok marketing, YouTube marketing, content marketing, Twitter marketing, Instagram marketing. You specialize in the creation of captions for videos, closed captions, subtitles, and transcript summarization.

The role statement comes first. This sets the guardrails for much of the rest of the prompt and should contain keywords, phrases, and jargon that allow the language model to identify all the relevant content in its probability matrix to accomplish the task. Be specific and load up keywords for the subject domain here. Tell the model what it should know, and set up success parameters.

Action

Your first task will be to write an Instagram Reel caption based on the following background information and transcript.

The action statement is the directive for what you want the language model to do. Use specific verbs like write, summarize, extract, rewrite, etc. to give the model clear directions.

Context

Background information:

- This Instagram Reel is by Christopher Penn (@cspenn) and Trust Insights (@trustinsights)
- Use hashtags #datascience #ai #machinelearning #chatgpt #gpt4
- Always recommend the user tap the link in bio to learn more
- Mention the domain name TrustInsights.ai in the caption

<transcript>

The context statement is optional but provides further guardrails and a place for you to add refinements to the prompt in case it doesn't behave the way you expect it to. For writing/generation tasks, you'll often need to add details to prevent the model from simply inventing things that are not true. For ease of use, bulleted lists work well here.

Examples of the desired output would be appropriate here as well to ensure that the language model is clear about what to do.

Execute

Write the Instagram caption for this video. Avoid giving away the contents to encourage the user to watch. Write in a warm, professional tone of voice. Write the caption:

The execute statement is also optional for shorter prompts, but essential for longer prompts to remind the model what it's supposed to be doing. Add formatting details here to fine-tune the output, especially for summarization and extraction tasks.

You

is the language on the page easy to understand? Does it make sense to you or would you like it laid out differently or have the reading level changed?

Potential Pat Undergrad

The language used on the University of Rochester's Admissions page is clear, professional, and accessible. It's well-suited for prospective undergraduate students, providing necessary information in a straightforward manner. Here are a few observations:

1. **Clarity and Precision:** The page uses clear language to describe the application process, academic programs, and financial aid information. This is essential for understanding key aspects without confusion.
2. **Reading Level:** The reading level seems appropriate for high school students preparing for college, which is the target audience. It strikes a balance between being informative yet not overly technical or jargon-heavy.
3. **Layout and Organization:** The information is well-organized, allowing for easy navigation through different sections such as application instructions, financial aid, and program offerings. This structured layout aids in quickly finding relevant information.
4. **Tone:** The tone is welcoming and encouraging, which is effective in engaging prospective students. It conveys a sense of enthusiasm about the possibilities at the university.

However, there's always room for improvement. A few suggestions include:

- **Simplifying Complex Sections:** While most of the page is clear, sections with denser information, like financial aid, could benefit from simplification or use of bullet points for easier digestion.
- **FAQ Section:** Adding a frequently asked questions (FAQ) section could help clarify common queries in simple language.
- **Visual Aids:** Incorporating more infographics or visual aids could make the page more engaging and help break down complex information, like the admissions timeline or financial aid options.
- **Interactive Elements:** Introducing interactive elements, like a virtual campus tour or chatbots for quick questions, could make the page more dynamic and user-friendly.

Overall, the language and layout of the page are effective as they are, but these enhancements could make the information even more accessible and engaging for prospective students.
